DB5 L-SHAPED DOCK BUMPER

Heavy-duty protection for the harshest loading bays

pittman[®]

OVERVIEW

The DB5 L-Shaped Dock Bumper is designed to protect loading docks from frequent vehicle impacts, extending the lifespan of dock structures in busy industrial environments. Its durable construction helps prevent damage, reducing maintenance and repair costs over time.

The unique L-shape provides both front and top-edge protection—an essential feature for safeguarding the most vulnerable areas of a loading dock. This extra coverage helps prevent wear and tear from trucks during loading and unloading, ensuring long-term structural integrity. Built from high-quality materials, the DB5 is designed to withstand heavy use and harsh conditions.

PRODUCT FEATURES

- Heavy-duty rubber construction – built to withstand repeated HGV impacts
- L-shaped design – provides enhanced edge protection in high-traffic areas
- Easy bolt-down installation – secures directly to surfaces for quick setup
- Highly durable – maintains performance even after multiple impacts

TECHNICAL DATA

SPECIFICATION	DETAILS
SKU	862408
Material	TPX Tyre Compound
Colour	Black
Height	440mm
Depth	95mm
Width	440mm
Weight	12kg
Applications	Heavy duty protection for the top of loading bays, offering dual protection to docks and top edges. Suitable for use with most HGVs and trucks.

INSTRUCTIONS FOR USE

- 1. Choose the Installation Surface:** The bumper can be securely bolted onto steel or concrete loading docks
- 2. Mark the Holes:** Place the bumper firmly on the dock in the desired position. Use the bumper as a guide to mark the locations for the fixing holes.
- 3. Drill the Holes:** Move the dock bumper aside and drill holes where you marked.
- 4. Install the Bumper:** Line up the bumper with the drilled holes. Then, bolt it securely into place.
- 5. Ready for Use:** Once installed, the dock bumper is ready to use immediately.
