

# DEFENDER CORNER PROTECTOR

## 90 DEGREE - STEEL

Built to Take a Hit, Designed to Spring Back.

**pittman**<sup>®</sup>

## OVERVIEW

The Defender 90 Degree Steel Corner Protector is a tough and reliable way to keep your corners safe from damage in busy areas. Its durable build means it can handle wear and tear, even in demanding conditions.

The bold black and yellow design makes it hard to miss, helping to prevent accidents before they happen. You can easily install it in various settings, with options to either bolt it down or secure it in concrete, depending on your needs.

With its 90-degree shape, it's perfect for protecting those tricky spots where damage is most likely to occur.

## PRODUCT FEATURES

- Ideal for safeguarding vulnerable 90-degree corners in high-traffic areas
- Hot-dip galvanized and powder-coated for superior corrosion resistance
- High visibility with bold black and yellow design to prevent accidents
- Flexible installation options: bolt down or concrete in for added security
- Designed for heavy-duty use in industrial and warehouse settings

## TECHNICAL DATA

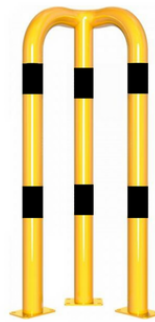

SPECIFICATION	350/650	350/1150MM	600/650MM	600/1150MM
Material:	Hot-dip galvanised steel and powder coating			
Colour:	Yellow & Black			
Height:	650mm	1150mm	650mm	1150mm
Width:	350mm		600mm	
Steel Tube:	76mm Ø			
Weight:	13kg	19kg	16kg	22kg
Applications:	Various applications including; factories, warehouses, transport depots, supermarkets and airports.			

350 X 650MM

350 X 1150MM

600 X 650MM

600 X 1150MM

## INSTRUCTIONS FOR USE

- 1. Prepare the Area:** If using the bolt down version, ensure the area is clear of debris and the concrete is free from cracks or other damage. With the concrete in version, dig the hole required for the legs. We recommend installing it at least 350mm below ground.
- 2. Position the Guard:** Position the guard in a way that covers the corner, column or machinery from the highest-traffic zone.
- 3. Ready for Use:** Once the guard is bolted down or concreted in it is ready for immediate use. Little maintenance is required.
