ECONOMY DOCK BUMPER

Cost-effective protection for light-traffic loading bays

pittman[®]

OVERVIEW

The Economy Dock Bumper is a compact and cost-effective solution for loading bays with light traffic. Designed to act as a dock leveller, it helps protect steelwork around the dock from minor impacts. Unlike heavy-duty bumpers, it does not include a front or back plate, making it a simpler and more economical choice.

Made from durable natural rubber, this bumper is built for long-term outdoor use. It can be securely bolted directly to the dock at the required height for effective protection. Fixings are needed for installation but are not included. Each bumper is sold individually.

PRODUCT FEATURES

- Cost-effective dock bumper – ideal for light-traffic areas
- Durable natural/SBR rubber – provides reliable impact protection
- Direct bolt-on design – installs easily without a front or back plate
- 100mm depth – fixings required but not included

TECHNICAL DATA

SPECIFICATION	DETAILS
SKU	862404
Material	Natural/SBR Rubber
Colour	Black
Height	330mm
Depth	100mm
Width	250mm
Weight	7kg
Included fixings	2no. M20 x 220mm anchors with 50mm x 3mm washers
Applications	Ideal for light-traffic loading bays and docks

NO REAR PLATE
Direct bolt on design without the need for a back plate

FIXINGS INCLUDED
Bolt directly to loading bays and docks

INSTRUCTIONS FOR USE

- 1. Choose the Installation Surface:** The bumper can be securely bolted onto steel or concrete loading docks
- 2. Mark the Holes:** Place the bumper firmly on the dock in the desired position. Use the bumper as a guide to mark the locations for the fixing holes.
- 3. Drill the Holes:** Move the dock bumper aside and drill holes where you marked.
- 4. Install the Bollard:** Line up the bumper with the drilled holes. Then, bolt it securely into place.
- 5. Ready for Use:** Once installed, the dock bumper is ready to use immediately.
