# HDPE KERB RAMP

Boosts accessibility while reducing slips and falls

**pittman**<sup>®</sup>

## OVERVIEW

The HDPE Kerb Ramp is a durable solution for providing easy access over kerbs and small steps. Its sturdy design ensures it can support heavy loads, making it suitable for trolleys, wheelbarrows, and light vehicles.

The ramp's surface is designed to offer excellent grip, even in wet conditions, reducing the risk of slips and keeping users safe. Built with portability in mind, it includes convenient carry handles for effortless transport and setup.

Whether you're working on construction sites, managing a facility, or organising events, this ramp provides a reliable, easy-to-use option for smoother access across various terrains.

## PRODUCT FEATURES

- Versatile - 350kg weight limit allows the ramp to be used with carts, trolleys, wheelchairs and more
- Long-lasting - made from tough HDPE for years of reliability
- Improved grip - anti-slip surface pattern reduces the risk of slips and falls
- Transportable - includes internal carry handles for easy moving
- Fast installation - suitable for temporary use or can be bolted down for permanent use

# TECHNICAL DATA
