

# METRO RETRACTABLE BELT POST

SET OF 2

Effortlessly Guide Crowds With Style & Ease

**pittman**<sup>®</sup>

## OVERVIEW

The Metro Retractable Belt Post is a stylish and practical solution for managing foot traffic indoors. Whether you're setting up a queue system or controlling access, this barrier makes the process easy and efficient.

It comes with a 3-metre belt that covers a lot of ground with just a few posts, allowing you to set up your space faster with less hassle. The base, filled with concrete and featuring built-in rubber floor protectors, provides excellent stability, ensuring the post stays in place even in busy areas.

Multiple belt connection points let you customize your setup, making it easy to create the exact layout you need. Choose from an all black design. or stainless steel posts with a blue belt for an added layer of style.

## PRODUCT FEATURES

- Flexible Layout - Flexible belt connection points enable easy layout customization to suit your space.
- Stable & Secure - The 9kg weighted base with rubber protectors keeps posts stable in high-traffic areas.
- Anti-Retractation Belt - Integral lock prevents the belt from accidentally retracting into the post.
- Efficient Coverage - The 3-metre black belt spans longer distances, reducing posts for quicker, cost-effective setup.
- Durable Materials - Made from steel, the posts ensure durability for effective queue and access management.
