# MULTIMAX™ CHAIN POSTS

SET OF 6

Protect and Direct for Safer Spaces

**pittman**®

## OVERVIEW

The MultiMax Chain Barrier Kit offers a reliable and durable solution for crowd control and safety management.

Featuring red and white posts connected by a 15-metre chain this barrier is ideal for guiding pedestrians and restricting access in both indoor and outdoor spaces. The flexible, weighted bases are designed to withstand impact and prevent damage, ensuring long-lasting use.

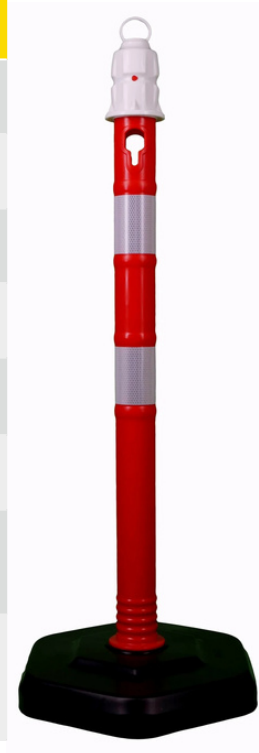

With easy assembly and enhanced stability, the MultiMax is perfect for use in shops, warehouses, malls, and any area where pedestrian safety is a priority.

## PRODUCT FEATURES

- Unmatched durability - made from strong plastic, ensuring a tough, long-lasting design
- Reinforced base - strong enough to withstand heavy winds and occasional impacts
- High visibility - equipped with reflective tape for increased visibility
- Quick and easy assembly - screw-in design for easy on-site setup
- Versatile - suitable for a wide range of environments where safety is crucial

# TECHNICAL DATA

SPECIFICATION	DETAILS
Material:	Polypropylene copolymer
Color:	Red & White
Height:	1000mm
Diameter:	63mm
Base Diameter:	350mm
Weight	27kg
Chain length:	15m
Applications:	Wide range of indoor and outdoor applications including car parks, warehouses, loading docks, schools, walkways, industrial facilities.

**VERSATILE DESIGN**  
Connect chains using including chain eyes and connection points

**HEAVY DUTY BASE**  
Suitable for use in high winds, resistant to occasional vehicle impact

## INSTRUCTIONS FOR USE

- 1. Assemble the Posts:** Simply screw the posts into the bases for immediate use.
- 2. Connect the Chain:** Using the connection hooks, attach the chain to the posts, either in the full or in sections as needed
- 3. Position the Posts:** Arrange the posts as needed.
